### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the recited semiconductor device comprising first and second cavities on opposite surfaces of a high thermo conductive ceramic substrate with first and second active elements mounted within the respective cavities and a heat dissipating via formed and heat dissipated outward through the via, the high thermo conductive substrate and an electrode on the second surface of the substrate.

Ohata et al., U.S. Patent 6,320,543, discloses a microwave and millimeter wave circuit apparatus. As shown in Figure 1a – 1c, the device comprises a high thermoconductivity substrate 7 having a cavity 2 in its surface. This cavity is the location of the active element 1 mounted on a circuit pattern with an external electrode 3 electrically connected to the circuit pattern.

Hosoya, U. S. Patent 6,072,122 discloses a multi-chip packaging structure having chips sealably mounted on opposing surfaces of the substrate. As shown in Figure 3F, active elements 4 and 4' are located on opposite surface of the substrate 1'.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
